

HS Boyd,

Thanks are to your product of the IOC. This product not only has increased our through put but has finally given us a consistent perf that is easy to tear with a smooth edge. This process has always been time consuming and less than acceptable.

The set-up time is as simple as loading a plate. I can run as long as I need and as fast as the press will run without any issues. Since the first IOC we have purchased 3 different configurations of the die. With each die the turnaround time was exceptional with no error.

We have yet been able to exceed the life of the IOC with thousands of impressions already on it.

Thanks Again,

**Terry Simpson**  
Production Manager
