

Frank,

I am absolutely THRILLED with how well this has worked out.
Once pressure settings were taken care of, the artwork fell right into place with no adjustments.

This will be a nice boost to our portfolio here at WCP.

Thanks so much for all the information and attention to detail you gave us.

One question: What's the lifespan in terms of impressions on a die like this?
I have an impression log set up in the pressroom so we know when we approach the point that it may wear out.

Thanks again!
Eric
